What is the

No Credit Check Payment Plan?

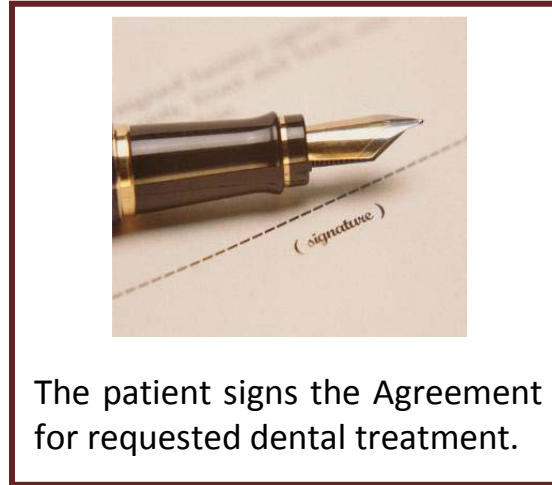

The FlexChex90 no credit check program allows the patient to purchase treatment today, and gives that patient the opportunity to pay for the services over a 90-day period. The program is based on turning paper checks into guaranteed electronic debits from the patient's checking account.

This check conversion guarantee program gives the patient the ability to receive the services they want and need immediately, when qualifying for credit or paying up front may not be an option.

All it Takes Is 4 Easy

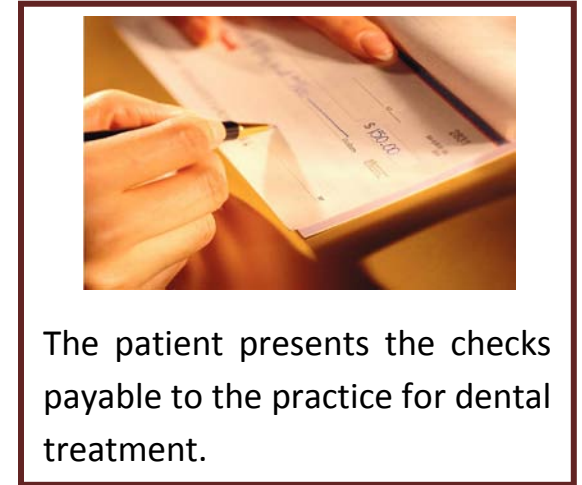

Steps to Set Up!

1

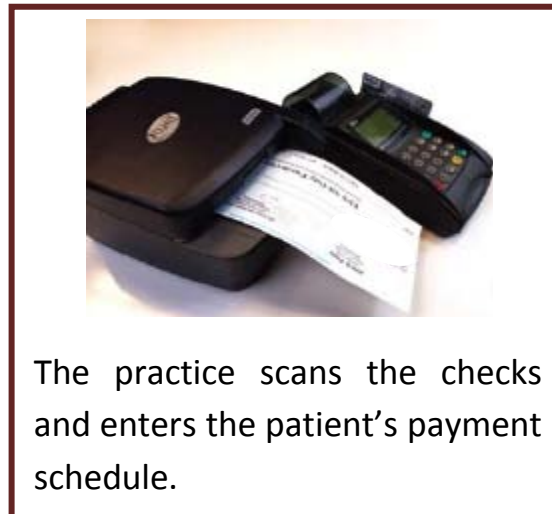

The patient signs the Agreement for requested dental treatment.

2

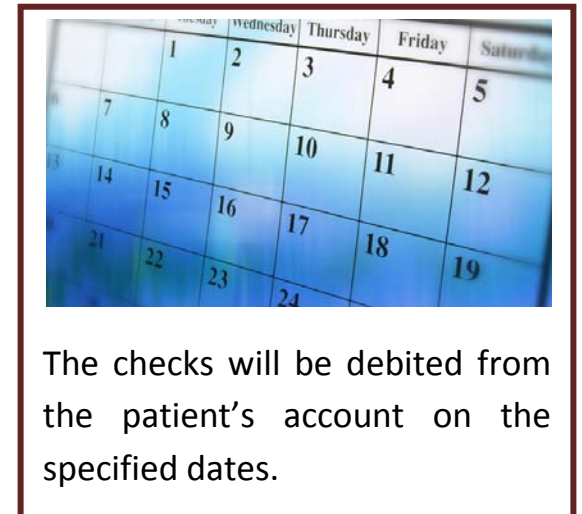

The patient presents the checks payable to the practice for dental treatment.

3

The practice scans the checks and enters the patient's payment schedule.

4

The checks will be debited from the patient's account on the specified dates.

A Fast & Easy Way To Get The
Dental Treatment You Want &
Need Now.
